

Screening Questions for External Transfers & Direct Admissions:

Additional Questions for Accepting Physicians:

- 1) Does the patient have unexplained hypoxia?
 - 2) Does the patient have infiltrates on chest x-ray?
- If yes to either of these questions, patient should be admitted to a COVID Unit.

Note: Travel is an important part of the history, but patients need to have symptoms concerning for COVID such as cough, fevers, and/or shortness of breath (i.e. symptomatic) for admission to COVID units.
